

Electrolytes for Cleaning & Polishing

Best quality as usual in a brand-new outfit

With Reuter electrolytes you clean and polish super fast in one step. Afterwards the surface is protected against corrosion – immediately.

Not least, the high processing speed is due to the formula: we use only best-quality natural mineral acid. In contrast to many other manufacturers, we do not use cheap additives (such as surfactants, stabilizers, citric or sulfuric acids). And that's why our electrolytes are guaranteed non-toxic: the mineral acid used is approved as food additive E338 – for example for cola drinks.

We have now given our electrolytes a new outfit: super-tight bottles and canisters with UN hazardous goods approval, indestructible, in fashionable Reuter orange. And because the new bottling plant is working so fast, there are even real price advantages – look out for the inexpensive new packaging units (next page).

The number of the UN dangerous goods approval is stamped on the containers.

Cleaner

The electrolyte for cleaning and passivating TIG welding seams with light to normal tarnish. Especially suitable for matt and grinded surfaces.

Item no.	Description	Quantity	Packaging Units (PU) & Prices						
			€/Unit	PU	€/Unit	PU	€/Unit	PU	€/Unit
EP-04-130	1 liter bottle	1	13,50	8	*	40	*	120	*
EP-04-041	5 liter canister	1	49,00	4	*	64	*	128	*
EP-04-140	25 liter canister	1	220,00	12	*	24	*	48	*

* prices on request

SuperCleaner

The electrolyte for cleaning and passivating TIG and MIG welding seams with normal to strong tarnishing. Especially suitable for shiny, brushed and polished surfaces.

Item no.	Description	Quantity	Packaging Units (PU) & Prices						
			€/Unit	PU	€/Unit	PU	€/Unit	PU	€/Unit
EP-04-131	1 liter bottle	1	17,50	8	*	40	*	120	*
EP-04-042	5 liter canister	1	79,00	4	*	64	*	128	*
EP-04-141	25 liter canister	1	330,00	12	*	24	*	48	*

* prices on request

Polisher

The electrolyte for cleaning, polishing and passivating TIG, MIG and MAG welding seams with normal to very strong tarnishing. Especially suitable for shiny and polished surfaces. Also very suitable for quick cleaning.

Switch to AC (alternating voltage) when cleaning, polishing only with DC (direct voltage).

Item no.	Description	Quantity	Packaging units (PU) & Prices						
			€/Unit	PU	€/Unit	PU	€/Unit	PU	€/Unit
EP-04-132	1 liter bottle	1	24,00	8	*	40	*	120	*
EP-04-043	5 liter canister*	1	109,00	4	*	64	*	128	*
EP-04-142	25 liter canister	1	440,00	12	*	24	*	48	*

* Due to ADR regulations for shipping limited quantities, Polisher 5 litre canisters are only filled with approx. 4.4 litres net. This way we stay below the 30kg limit per package in the LQ range for the 4x5L carton.

* prices on request

We ship 1l bottles in boxes of 8, 5l canisters in boxes of 4 and 25l canisters in full layers of 12 on Euro pallets. Cartons can be shipped as „Limited Quantity“ (LQ) with UPS; this is permitted by the hazardous goods regulation up to 30 kg gross and under 5 litres in individual containers. 25l canisters must always be registered as dangerous goods, marked accordingly and shipped with a forwarding agent. All prices are ex works plus VAT and freight. Subject to price revisions – status January 2020.
